

First discharge of Citroën and Peugeot cars took place in Petrolesport terminal

On December, 15 2011 in the seaport terminal Petrolesport the first discharge of Citroën cars and Peugeot for the company GEFCO was held.

GEFCO is a global leader of logistics automotive industry and nearly 25% of the company is focused on logistics management of Peugeot and Citroën around the world. The company has been operating on GEFCO market since 1949 and is among the ten largest logistics companies in Europe.

Prior to this upload ROLF SCS and GEFCO were partners – ROLF SCS did the transportation of Mitsubishi cars from the PSA factory in Kaluga. We were able to establish strong partnerships with GEFCO, and largely thanks to this, the port Petrolesport was chosen by them as the main Russian discharge platform. Now ROLF SCS provides all discharge of Citroën and Peugeot cars, arriving by Kess ferries from the German port Zeebrugge.

Transportation for GEFCO is one of the links in the supply chain, which ROLF SCS performs for its clients. In this regard, Citroën and Peugeot can be considered as new brands in the portfolio of shipping of ROLF company, which we are very proud of.

ROLF has already existing contracts of port handling with such brands as Mitsubishi, Mercedes-Benz, Hyundai, Jaguar, Land Rover, Saab, Rover, Nissan, Infiniti, Renault, Suzuki and Ssang Yong.

The recent completion of the portfolio with brands of Peugeot and Citroën allows our company to sign new contracts for the road transportation, which, in fact, ROLF SCS is planning to do in the next year 2012.
